

Electronic Fixed Income Market Access

Knight BondPoint is a leading provider of electronic fixed income trading solutions that provides retail brokerage firms with access to centralized liquidity and automated, cost-efficient trade execution services.

Knight BondPoint Solutions

- **Knight BondPoint ECN**

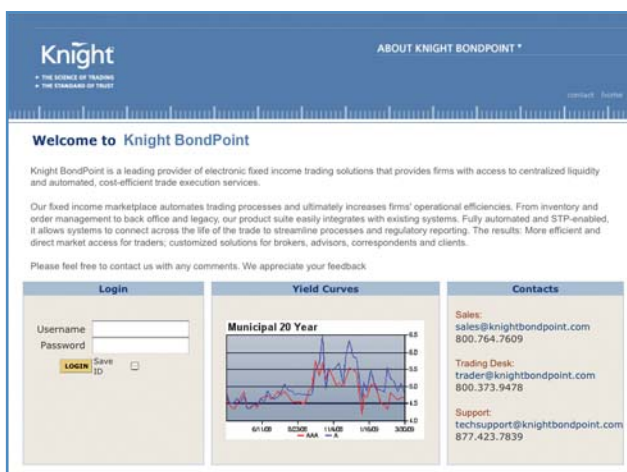

Knight BondPoint's fixed income ECN is a centralized, electronic inter-dealer system – connecting more than 200 broker-dealers and provides access to more than 35,000 live and executable offerings. The Knight BondPoint ECN can be accessed via our proprietary API, a FIX connection or through Knight BondPoint's proprietary application suite.

- **Broker Workstation**

The Knight BondPoint Broker Workstation, a customizable front-end application allows financial advisors and brokers to easily search, analyze and execute trades for municipals, corporates, agencies, treasuries and certificates of deposit, as well as access new issues, news, commentary and fixed income tools. The technology can also be configured to offer a robust set of fixed income products and tools for retail investors.

- **Trader Workstation**

Additionally, Knight BondPoint offers a web-based trading application. The Knight BondPoint Trader Workstation provides trading professionals with advanced fixed income trading capabilities, including direct market access to live trading on the Knight BondPoint ECN, as well as fixed income tools and analytics.

Superior Technology

Knight is a leading provider of trade execution services to more than 2,000 buy- and sell-side firms. Knight BondPoint clients benefit from Knight's exchange-like infrastructure, technological expertise and one of the industry's largest client service teams. Knight's infrastructure enables broker-dealers to leverage existing connectivity used for equities trading with Knight to automate and efficiently scale up fixed income capabilities.

Knight BondPoint's product suite easily integrates with proprietary and third-party systems, from inventory and order management, to back office and legacy systems. Fully automated and STP-enabled, it supports automation throughout the life of the trade to streamline processes and operations. Knight BondPoint also provides comprehensive and advanced solutions to address the evolving regulatory environment, enhancing compliance functionality, centering on exception reporting and trade execution documentation and archival.
